- 1) Cascade Port: XS2, XS3, XS4
 - 2) Indicators: HL1~HL40 indicators light red, green and yellow in turn as GST-IFP4M control panel tests itself.

Connection & Wiring

Fig. 1 Cascade Connection

Installation

ZC-400 Zone Display and Control Board (RY color) is installed on the P-9981 panel (without keys) or P-9982 panel (with keys). Install that on to the GST-IFP4M according to the "↑". Then fix it with two screws.

Fig. 2 ZC-400 Zone Display and Control Board

Fig. 3

P-9981 P-9982 Zone display and control panel is installed on the cabinet door. The following Fig.4 shows how to install it.

Fig. 4

First, Align the snap of the zone display and control panel with the slot on the door; Second, Hook the zone display and control panel with the door; Finally, fix the panel with screws.

Set Address

Put the code switch of SW1 (as shown in Fig.2) to the side of the number. Actual address= Address of the Code Switch +1.

For example: If the actual address is 2, dial the code switch to the side of number 1. If the actual address is 1, there is no need to dial the code switch.

Installation of Labels

Installation steps Fig.5 are shown below for labels on the ZCP.

Take the transparent baffle from the ZCP by using a small screwdriver. Put the printed label into the slot for ZCP label and then restore the transparent baffle. Maximum 8 locations can be installed with P-9981 or P-9982 Zone display and control modules.
